

## MARINA RE FIT MAKES A POSITIVE STATEMENT

Scarborough Marina is situated only 35 minutes from Brisbane central in the all-weather, all-tides access Scarborough Boat Harbour. The Marina offers full boat yard facilities with both a 35 tonne Marine Travel lift and Wiggins Marine forklift. All major hardstand services and facilities are available with a range of quality onsite tenant services. Drystack storage with launch and retrieval is available for power boats up to 9M. Long term cradle storage is available for yachts.

Prior to working together The Jetty Specialist was already well known to the team at Scarborough Marina as a reputable builder of marinas. The Jetty Specialist was invited by marina management at Scarborough to tender for the project along with 2 other marina companies. "The Jetty Specialist's solution was very competitively priced and in our opinion of superior quality", Scarborough Marina Owner and Director Mark Robertson said. As a past president of the Queensland Marina Association, Marks recognition of The Jetty Specialist as a supplier of exceptional quality within the industry was a very positive endorsement of what they do.

Mark Robertson continued to say, "The Jetty

Specialist and their personnel were a pleasure to deal with, and what otherwise could have been a very stressful time became a positive experience for all of our team at the marina."

All projects have their own challenges, but the management team at Scarborough Marina were extremely impressed that The Jetty Specialist and how their team worked quickly to find ways to work around any potential problems, plus they were always able to contact the right people when required to sort out matters as quickly as possible.

Mark told us the completed job at Scarborough Marina exceeded all expectations in both quality and presentation and that customers and visitors to the marina have also commented very positively.

When asked if he would use The Jetty Specialist again for work at Scarborough Marina, Mark Robertson had no hesitation in replying yes and also went on to say that he would highly recommend The Jetty Specialist to other contacts.
